Sprint 2 Report

Actions we should stop doing:

Stop testing manually by default. Manual testing doesn't scale. We should prioritize writing tests for the feature as it's implemented (but we still individually test each function as well).

Actions to Start Doing:

We should start tracking daily scrums. It's important to keep people accountable and have daily meetings. That way it's easy for people to stay on track of their tasks.

Actions to Keep Doing:

Keep modularizing logic across tokenizer/parser/evaluator. This made collaboration and debugging much easier.

Keep consistent coding style and naming conventions. Everyone sticks to the same spacing and formatting, this reduces confusion.

Work Completed:

Testing
Symbol Table
String Interning

Work Not Completed:

Tokenizer

Work Completion Rate:

Metric	Value

Tasks Planned	8
Tasks Completed	5
Total Estimated Hours	40
Total Hours Completed	30
Sprint Duration	7 days
Tasks/day	.71
Hours/day	4.28

Average across the sprints:
Tasks/day: 0.57
Ideal Hours/day: 3.71
